Notes	
rearranging courses	Decisions
	Are these changes likely to lead to classes with under 10 students?
rearranging courses and new concentrations	Visually looks confusing. Potentially consider embedding concentrations as certificates?
	Questions about Practicum or Study Abroad options in terms of policy (Is this creating a disparate impact based on student finance, etc.?) Also, can you comment on why this stand-alone certificate is worth having?
	Moved to the agenda with Questions sent ahead of time through email

comparison in curriculog	Question about are the midterm and final exams the same for both classes? Is the grading scheme the same in terms of grading exams or do they have different standards? Syllabi needs to be changed to match summary table. Do students get Bioinformatics as an introduction with a biology degree and if so, does this need to be cross-listed? What are appropriate degrees to teach the course? Pay particular attention to learning objectives.

	Discussion for further clarification and move to agenda
change admission requirements	Could combine the two number 3s as a series of 3 choices, GRE, or 3.25 GPA, or 2.8 GPA and 4 Years of successful work experience? Proposal should be sent to back for review to discuss what is possible with admissions. Could eliminate paths and also resume possibly and update proposal. Academic references potential?
goes with MFA Dance	Still on hold
curriculum includes state/national standards, CPED, specificity to research, concentration in Higher Ed Administration, admissions requirements, change in hours (from 72 to 60)	Moved to the agenda
revised to meet the needs of educational leaders
